Exhibit B to Claim Filed Against the City of Redding Detailed Reponse to Question #3

Circumstances giving rise to this claim: The Carr Fire started when a flat tire on a vehicle caused the wheel's rim to scrape against the asphalt, creating sparks that set off the fire. The rapid and uncontrollable spread of the fire into and through the City of Redding was due to the existence of a dangerous condition consisting of overgrown, uncleared brush in an area under the control of the City of Redding, resulting in various degrees of damages. The existence of the dangerous condition was previously known by the City of Redding as an extreme fire danger as early as 2010, when the City devised a vegetation plan to reduce fire hazards. The City of Redding failed to implement the proposed vegetation plan in 2010, or in any year thereafter, leading to the damages suffered by Claimants' insureds.
